| • BITZ 2023 Session 2: Understanding the Innovator's Role in Digital Transformation | 2023 |
| • National Certificate II in Animation | 2020 |

PROJECTS

- NexFleet Dynamics: Bus Transportation Management System – Logistics Module (2024)**
Built a comprehensive web-based logistics system using Laravel (backend) and React (frontend) for bus transportation management, featuring inventory control, warehouse operations, audit tracking, and infrastructure management.
- Hospital Human Resources Management System (2024)**
Designed a custom web application using React to streamline hospital HR operations, including modules for employee records, attendance tracking, scheduling, and performance monitoring.
- WhatsNewFeed (2024)**
Developed a web-based platform using React and the Spotify Web API to display the latest music releases from artists followed by the user, enhancing music discovery and expanding Spotify's default viewing limitations.
